```
#Note, Each gray box below is a code chunk. You need to insert a code chunk
and put your R code in it. By setting echo = FALSE. this comment and any code
will not show in my output document. If it were TRUE, the comment and code
would appear.

##
## Attaching package: 'dplyr'

## The following objects are masked from 'package:stats':
##
##     filter, lag

## The following objects are masked from 'package:base':
##
##     intersect, setdiff, setequal, union
```

We have data about 53940 diamonds. Only 462 are larger than 2.2 carats. The distribution of the remainder is shown below:
